## Acknowledgement

Knowledge in itself is a continuous process. At this moment of our substantial enhancement, We rarely find words to express our gratitude towards those who were constantly involved with us.

The completion of any inter disciplinary project depends upon coordination, cooperation and combined efforts of several resources of knowledge, creativity, skill, energy and time. The work being accomplished now, We feel our most sincere urge to recall and knowledge through these lines, trying our best to give full credit wherever it deserves.

We would like to thank our project guide **Mr. Abhilash Shukla** and Dean & Principal **Dr. Atul Patel** who advised and gave us moral support through the duration of our project. Without their constant encouragement we could not have been able to achieve what we have.

It's our good fortune that we had support and well wishes of many. We are thankful to all and those names which have been forgotten to acknowledge here but contributions have not gone unnoticed.

With Sincere Regards,

**Shyamal Ka Patel (12MCA044)**

**Pooja Thaker (12MCA165)**

# INTRODUCTION TO TOOLS

## ❖ Introduction to Tools

### ➤ Front End Tool/ Language:

- **PHP**

- PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language.
- Originally it created by Rasmus Lerdorf in 1994, the reference implementation of PHP (powered by the Zend Engine) is now produced by The PHP Group.
- While PHP originally stood for Personal Home Page, it now stands for PHP: Hypertext Preprocessor.
- PHP code can be simply mixed with HTML code, or it can be used in combination with various templating engines and web frameworks. PHP code is usually processed by a PHP interpreter, which is usually implemented as a web server's native module or a Common Gateway Interface (CGI) executable.
- After the PHP code is interpreted and executed, the web server sends resulting output to its client, usually in form of a part of the generated web page

- **Joomla:**

- Joomla is an award-winning content management system (CMS), which enables you to build Web sites and powerful online applications. Many aspects, including its ease-of-use and extensibility, have made Joomla the most popular Web site software available. Best of all, Joomla is an open source solution that is freely available to everyone.

- **What are some real world examples of what Joomla! Can do?**

Joomla is used all over the world to power Web sites of all shapes and sizes.

For example:

- Corporate Web sites or portals
- Corporate intranets and extranets
- Online magazines, newspapers, and publications
- E-commerce and online reservations
- Government applications

- Small business Web sites
- Non-profit and organizational Web sites
- Community-based portals

### ➤ Back End Tool:

#### • MySQL

- MySQL is the world's second most widely used open-source relational database management system (RDBMS).
- It is named after co-founder Michael Widenius's daughter, My SQL phrase stands for Structured Query Language.
- The MySQL is owned by Oracle Corporation.
- MySQL is a popular choice of database for use in web applications, and is a central component of the widely used LAMP open source web application software stack (and other 'AMP' stacks). LAMP is an acronym for "Linux, Apache, MySQL, and Perl/PHP/Python."
- Free-software-open source projects that require a full-featured database management system often use MySQL.
- For proprietary use, several paid editions are available, and offer additional functionality.
- Applications which use MySQL databases include: Joomla, WordPress, PHP, Drupal and other software. Development Enhancements

# SYSTEM STUDY

## ❖ System Study:

### ➤ Existing System:

**What is the reason to create own website rather than selling on Flipkart, eBay or Amazon?**

### ↳ Reasons are as follow:-

The main reason for creating new website for selling item on existing website like flipKart, snapdeal or eBay is we have to pay huge amount of money for listing each item on their site. Another reason is if our product is sold then we have to pay some amount of money to website owner.

- When product is sold the amount which was paid by customer that will not immediate credited to seller account that money will be credited to mediator's (PaisaPay for ebay ,Trustpay for snapdeal etc.) account when customer accept the delivery then money will be credited to seller's account.
- Customers have to pay for getting latest information regarding offers, Sale etc. (Flipkart First).
- All this website provides selling of product of well-known manufacturing company so it's costly to buy for customer.
- For comparison of one product with another product we have to search on another website.
- Return policy of items is not good of Snapdeal. It will give refund amount in terms of SD cash not in transacted account so user must have to buy products of that SD cash within Six months.
- Flipcart delivery service is not up to the mark in villages when compared to urban areas. They only deliver product to specific areas even if user is willing to pay extra money.
- This entire website is using another android app for accessing their site on mobile platform all sites is not responsive.

## ➤ Proposed System:

- This website is created for a specific seller of WayToWeb Client for selling clothes.
- The website is so much user friendly with ease of navigation and simple user interface. Seller don't have to pay for listing items on this website within few clicks and inserting a product details and price of it product is on sell.
- If one of the product is sold through this website the amount of that product will be immediately credited to seller's account. Seller can send information regarding sale or any new products details to subscribed user and they will get mail without paying any amount.
- When Product is not in stock and customer want to purchase that item they can create wish list when the product is available all user who created wish list for that item they will get notification regarding that.
- Return policy of this website will so efficient when any issue will occur during that transaction then customer will get refund amount on their transacted account within few hours.

## ➤ Scope of the Proposed System:

This website is created for existing clothes store located at Ahmedabad .Using this website seller can sell their clothes online without investing too much money. Seller can add product details like price and it's specification through product insertion module. When any product is purchased by customer then orders details will be sent to seller's mobile using Google SMS Channel so seller logged in to website for further information regarding order. After accepting order by seller item will be shipped through one of the courier partner. If one of the products is not available in stock then customer can create wish list and according to that wish list when product is in stock they will get notification. Buyer can give their feedback of their transaction and review of purchased product if they want. Buyer can compare two items and take decision which item to buy.

- Maintains a product details.
- Maintains Sub Category details Category wise.
- Allows administrator to view the reports of sales made.

## Online Shopping Store

- Create Different Customer ID for each user or Customer.
- Maintains all the information of payments made by the customers.
- Allows user to update the profile details or delete there profile.
- Allows Administrator to add or delete product and categories.
- Maintains Shopping Cart for the customer so that they can shop.
- The users could subscribe for price alerts which would enable them to receive messages when price for products fall below a particular level
- Adequate searching mechanism for easy and quick access for particular product or service.
- payment mechanism and gateway for all popular credit card, debit card or other relevant payment option

### ➤ **Aim and Objective of the Proposed System:**

- Aim and objective of the proposed system is to develop a complete and efficient web application which can provide the online shopping of Clothes without having step out of the door.
- This is advantageous to seller because all other expanses like running physical store, paying salaries to staff member is so expansive
- This is also beneficial for buyer rather than going physical store.
- With the use of online shopping their product has access to a worldwide market which increases no of customer from different regions.

## ➤ **Feasibility Study:-**

- Once you define a problem you have to analyze whether this is feasible or not, because all possible solutions are not feasible and feasible one is not always possible. The detailed studies carried out to check the work ability of proposed system.
- A feasibility study is a test of system proposal regarding to its work ability, impact on the organization ability to meet user needs and effective use of resources. Thus when a new application is proposed it normally goes through a feasibility study before it is approved for deployment.
- Thus during feasibility analysis for this project, following primary areas of interest are to be considered. Investigating the existing system in the area under investigation and generating ideas about a new system does this.

## ➤ **Operational Feasibility:**

- An evaluation of the time, which is to be taken in the development of the project. The time scheduled required for the development for this project is very important since more development time affects machine time, cost and cause delay in the development of other systems.
- So the project is concerned should be completed within a fixed scheduled time as the company is concerned. Besides this, the project is assigned to the student as an academic exercise to complete within a fixed schedule of time.

## ➤ **Technical Feasibility:**

- A study of resource availability that may affect the ability to achieve an acceptable system. This evaluation determines whether the technology needed for the proposed system is available or not.
- It will avoid multiple file handling
- Report generation is very easy
- The new system provides full security of confidential data.

## ➤ **Economical Feasibility:**

- The economic feasibility study is more commonly called the cost/benefit analysis.
- This feasibility study present tangible and intangible benefits from the project by comparing the development and operational cost. The technique of cost benefit analysis is often used as a basis for assessing economic feasibility.
- This system needs some more initial investment than the existing system, but it can be justifiable that it will improve quality of service.
- Thus feasibility study should center along the following points:
  - Improvement resulting over the existing method in terms of accuracy, timeliness.
  - Cost comparison
  - Estimate on the life expectancy of the hardware.
  - Overall objective.
- Our project is economically feasible. It does not require much cost to be involved in the overall process. The overall objective is in easing out the recruitment processes.

# SYSTEM ANALYSIS

## ❖ System Analysis:

### ➤ ANALYSIS MODEL:

The model that is basically being followed is the WATER FALL MODEL, which states that the phases are organized in a linear order. If system exists one and modification and addition of new module is needed, analysis of present system can be used as basic model.

The design starts after the requirement analysis is complete and the coding begins after the design is complete. Once the programming is completed, the testing is done. In this model the sequence of activities performed in a software development project are: -

- Requirement Analysis
- Project Planning
- System design
- Detail design
- Coding
- Unit testing

**WATER FALL MODEL** was being chosen because all requirements were known beforehand and the objective of our software development is the computerization/automation of an already existing manual working system.

➤ **System Requirement Specification:**

**HARDWARE SPECIFICATION (MINIMUM)**

**Server Configuration**

Processor	Core 2 duo
RAM	512 MB
Hard Disk	10GB

**SOFTWARE SPECIFICATION (MINIMUM)**

**Server Configuration**

Operating System	Windows based Operating System or Linux
Server	Apache Server
Browser	Mozilla Firefox or Compatible Web Browser

**Client Configuration**

Operating System	Windows based Operating System, Linux or any operating system
Browser	Any Browser

## ➤ System Modules:

### 1. Registration/Login Module:

Registration module is use for registering new user by filling some necessary field such as email, username password etc. Using this module existing user can log in to the website. If any existing registered user forgot their username or password then they can request for username or password.

### 2. Product Module:

Product module is use for insertion of new product in to the website and managing existing products. New Product will be inserted by inserting product information such as product name, price, stock, size, image etc...

### 3. Product Compare Module:

Using this module user can compare one product with another product and take a decision whether to purchase or not.

### 4. Wish list Module

This module is use for managing wish list of user. If any user don't want to buy any product but in future they want to buy that product so they can add into their wish list and later they can purchase that product.

### 5. Cart Module:

This module is use for adding product into cart or removing product from cart.

### 6. Order Module:

This module is use for management of order which is given by user

Using this module admin can manage order status such as confirm, pending, canceled etc...

## **7. Payment Module:**

This module is use for managing payment of product. This module is use for PayPal or COD payment method integration to the Joomla.

## **8. Shipping Module:**

This module is use for creating shipping method such as on how much amount the shipping cost will be included or not in user's given order.

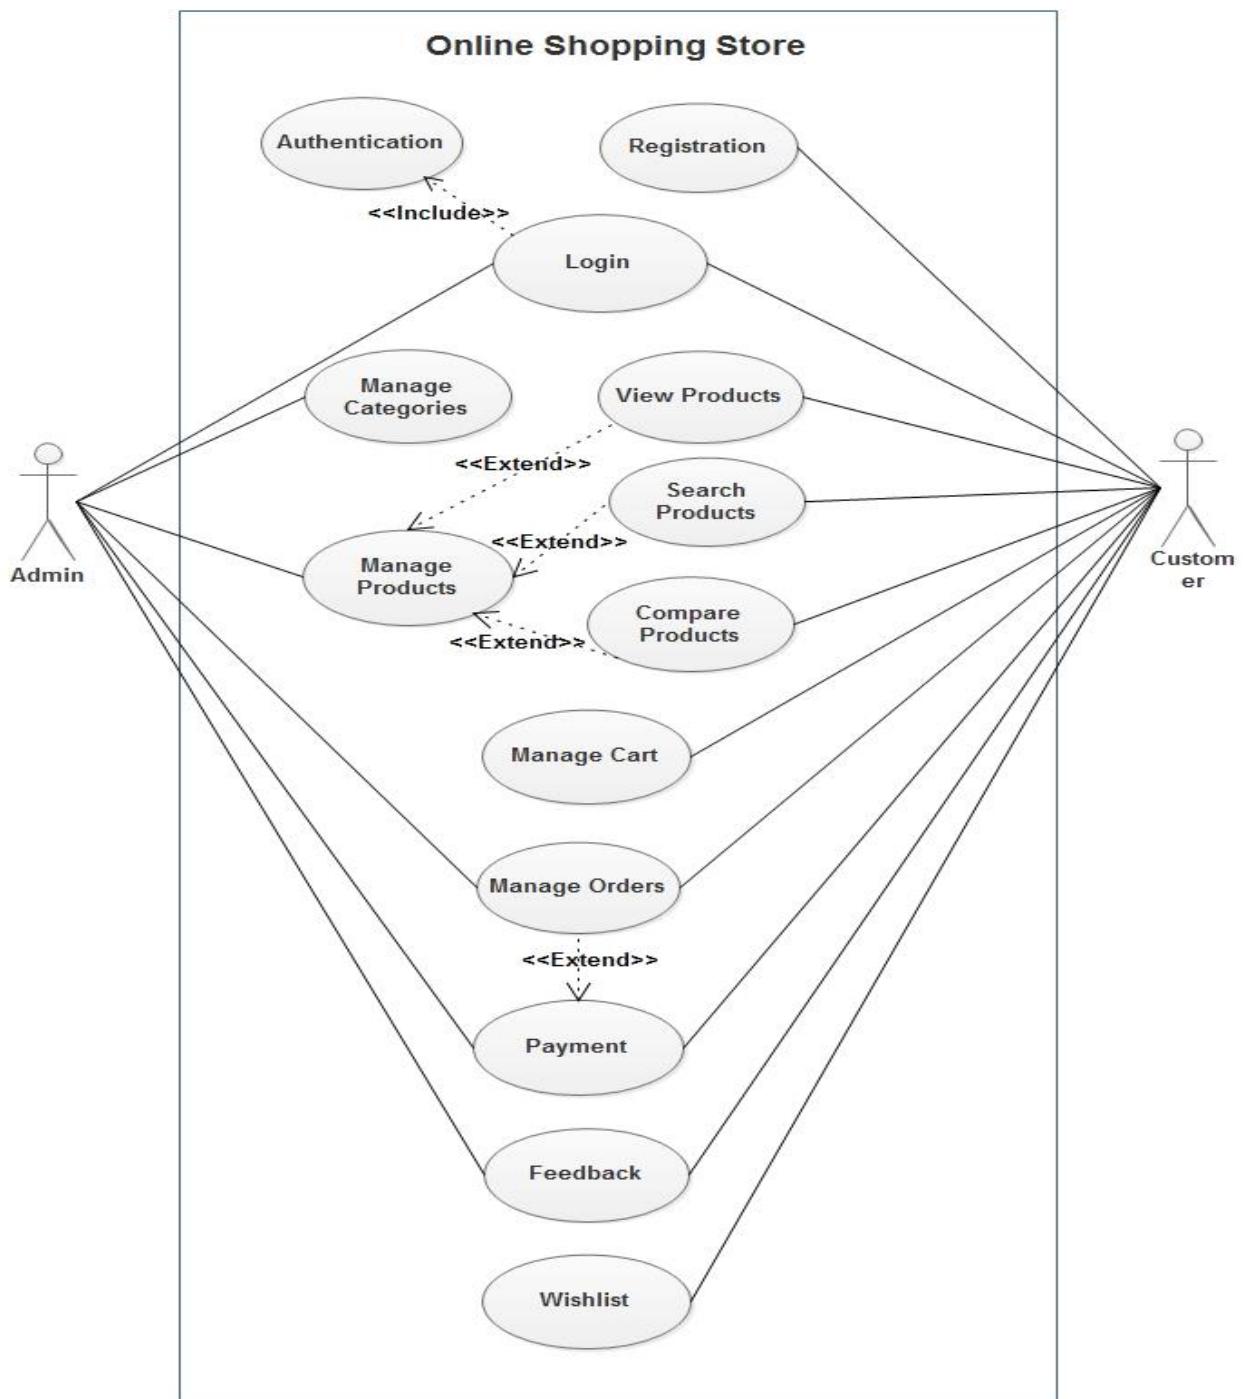

## **9. Feedback Module:**

This module is use for giving review or rating about product after giving Review administrator can have rights for publishing or publishing review comment

# DATA DICTIONARY

## ❖ Data Dictionary:

### 1) Table name: users

Attribute name	Data Type	Constraint	Description
<u>Id</u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	This is auto increment field which is use for internal data retrieve purpose
Name	varchar(20)	NOT NULL DEFAULT ''	Display name
username	varchar(20)	PRIMARY KEY	Username
Email	varchar(50)	PRIMARY KEY	Email Id.
Password	varchar(15)	NOT NULL	Password.
Usertype	varchar(15)	NOT NULL	It's specifying which type of user is. i.e. : registered, super user, publisher, public etc.
Block	Boolean	NOT NULL DEFAULT '0'	This filed specify whether user is blocked or not. 0=unblocked
sendEmail	Boolean	DEFAULT '0'	This field specifies whether mail is sent for user verification or not.
registerDate	Datetime	NOT NULL DEFAULT 0000-00-00 00:00:00	It's specify user registration date.
lastvisitDate	Datetime	NOT NULL DEFAULT 0000-00-00 00:00:00	It's specify user last visit date of website.
lastResetTime	Datetime	NOT NULL DEFAULT 0000-00-00 00:00:00	It' specifies on which date recent password was changed.

## Online Shopping Store

resetCount	int(1)	NOT NULL DEFAULT '0'	Its specifying total count of password changed.
------------	--------	-------------------------	---

### Sample Data

Attribute name	Data
<u>Id</u>	Super User
Name	Shyamal
username	admin
Email	shyamalkapatel@gmail.com
Password	admin
Usertype	deprecated
Block	0
sendEmail	1
registerDate	2015-03-03 15:10:10
lastvisitDate	2015-04-14 17:48:31
lastResetTime	0000-00-00 00:00:00
resetCount	0

## 2) Table name: userinfos

Attribute name	Data Type	Constraint	Description
virtuemart_user_id	int(4)	foreign key	This field is reference to <b>user's id</b> field.
Title	char(5)	DEFAULT NULL	It's specify title of the user i.e. Mr. ,Mrs. etc.
first_name	varchar(20)	DEFAULT NULL	It's specifying first name of the user.
middle_name	varchar(20)	DEFAULT NULL	It's specifying middle name of the user.
last_name	varchar(20)	DEFAULT NULL	It's specifying last name of the user.
address_1	varchar(64)	NOT NULL DEFAULT ''	It's specifying address of the user which is mandatory.
address_2	varchar(64)	DEFAULT NULL	It's specifying address of the user.
Zip	int(6)	NOT NULL DEFAULT '000000'	It's specifying pin code of the user which is mandatory.
City	varchar(15)	NOT NULL DEFAULT ''	It's specifying city of the user which is mandatory.
virtuemart_state_id	smallint(4)	FOREIGN KEY NOT NULL DEFAULT '0'	It's state id which references to <b>virtuemart_states's virtuemart_state_id</b> field.
virtuemart_country_id	smallint(4)	FOREIGN KEY NOT NULL DEFAULT '0'	It's country id which references to <b>virtuemart_countries's virtuemart_country_id</b> field.

## Online Shopping Store

phone_1	int(10)	DEFAULT NULL	It's specify phone no of the user.
phone_2	int(10)	DEFAULT NULL	It's specifying mobile no of the user.

### Sample Data

Attribute name	Data
virtuemart_user_id	538
Title	Mr
first_name	Shyamal
middle_name	d
last_name	Patel
address_1	6,Ka Patel Street,Vaso Ta-Nadiad
address_2	Vaso
Zip	387380
City	nadiad
virtuemart_state_id	419
virtuemart_country_id	99
phone_1	02682585636
phone_2	9426685636

### 3) Table name: countries

Attribute name	Data Type	Constraint	Description
<u>virtuemart_country_id</u>	smallint(4)	PRIMARY KEY, AUTO_INCREMENT	It's Primary key which is used of for country id.
country_name	varchar(20)	DEFAULT NULL UNIQUE KEY	It's specifying country name.
country_3_code	varchar(3)	DEFAULT NULL, UNIQUE KEY	It's specifying three char country code.
country_2_code	varchar(2)	DEFAULT NULL, UNIQUE KEY	It's specifying two char country code.
Published	Boolean	NOT NULL DEFAULT '1'	Its use for publish or un-publish country.

#### Sample Data

<u>virtuemart_country_id</u>	country_name	country_3_code	country_2_code	Published
99	India	IND	IN	1

#### 4) Table name: states

Attribute name	Data Type	Constraint	Description
<u>virtuemart_state_id</u>	smallint(4)	PRIMARY KEY, AUTO_INCREMENT	It's Primary key which is used of for state id.
virtuemart_country_id	varchar(4)	DEFAULT NULL	It's specifying country name.
state_name	varchar(20)	DEFAULT NULL	Its Specify name of the state.
state_3_code	varchar(3)	DEFAULT NULL, UNIQUE KEY	It's specifying three char country code.
state_2_code	varchar(2)	DEFAULT NULL, UNIQUE KEY	It's specifying two char country code.
Published	Boolean	NOT NULL DEFAULT '1'	Its use for publish or un- publish country.

#### Sample Data

Attribute name	Sample Data
<u>virtuemart_state_id</u>	419
virtuemart_country_id	99
state_name	Gujarat
state_3_code	GUJ
state_2_code	GU
Published	1

**5) Table name: vmusers**

Attribute name	Data Type	Constraint	Description
<u>virtuemart_user_id</u>	int(4)	FOREIGN KEY	This field is reference to <b>users' id</b> field.
virtuemart_vendor_id	smallint(4)	NOT NULL DEFAULT '0', UNIQUE KEY	It's Specify unique vendor id.
user_is_vendor	Boolean	NOT NULL DEFAULT '0'	It's Specify whether user is vendor or not.
virtuemart_paymentmethod_id	mediumint(4)	FOREIGN KEY, DEFAULT NULL	This field is reference to <b>virtuemart_paymentmethod's</b> <b>virtuemartpaymentmethod_id</b> field.
virtuemart_shipmentmethod_id	mediumint(4)	FOREIGN KEY, DEFAULT NULL	This field is reference to <b>virtuemart_shipmentmethod's</b> <b>virtuemartshipmentmethod_id</b> field.

## Sample Data

Attribute name	Data
<u>virtuemart_user_id</u>	538
virtuemart_vendor_id	0
user_is_vendor	0
virtuemart_paymentmethod_id	0
virtuemart_shipmentmethod_id	0

## 6) Table name: paymentmethods

Attribute name	Data Type	Constraint	Description
<u>virtuemart_paymentmethod_id</u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	It's specifying payment method id.
payment_jplugin_id	int(6)	NOT NULL DEFAULT '0'	It's specifying payment plugin id.
payment_element	varchar(20)	NOT NULL DEFAULT ''	It's specifying payment method name.
payment_params	varchar(100)	NOT NULL DEFAULT ''	It's specifying user's payment method configuration.
Published	Boolean	NOT NULL DEFAULT '1'	It's specifying that whether payment method is published or not.

### Sample Data

Attribute name	Data
<u>virtuemart_paymentmethod_id</u>	5
payment_jplugin_id	10013
payment_element	paypal
payment_params	
Published	1

### 7) Table name: shipmentmethods

Attribute name	Data Type	Constraint	Description
<u>virtuemart_shipmentmethod_id</u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	It's specifying shipment method id.
shipment_jplugin_id	int(6)	NOT NULL DEFAULT '0'	It's specify shipment plugin id
shipment_element	varchar(20)	NOT NULL DEFAULT ''	It's specifying shipment method name.
shipment_params	varchar(100)	NOT NULL DEFAULT ''	It's specify user's shipment method configuration like Shipment logo, zip start ,zip end, weight_unit etc.
Published	Boolean	NOT NULL DEFAULT '1'	It's specifying that whether payment method is published or not.

## Sample Data

Attribute name	Data
<u>virtuemart_shipmentmethod_id</u>	1
shipment_jplugin_id	10027
shipment_element	weight_countries
shipment_params	
Published	1

## 8) Table name: categories

<b>Attribute name</b>	<b>Data Type</b>	<b>Constraint</b>	<b>Description</b>
<u><a href="#">virtuemart_category_id</a></u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	It's specifying category id.
category_template	varchar(50)	DEFAULT NULL	It's specifying name of the template which is used for category.
category_layout	varchar(50)	DEFAULT NULL	It's specifying name of the template layout which is used for category (UI).
category_product_layout	varchar(50)	DEFAULT NULL	It's specifying name of the template layout which is product.
products_per_row	tinyint(4)	DEFAULT NULL	It's specifying no of the product which is displayed on category layout' row.
Hits	int(4)	NOT NULL DEFAULT '0'	It's describing total no of hits (Click) Per Category.
Published	Boolean	NOT NULL DEFAULT '1'	Its boolean filed which is used for category publish or un-published purpose.
created_on	Datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	It's describe date on which category is created.
modified_on	Datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	It's describe date on which category is modified.

## Sample Data

Attribute name	Data
<u>virtuemart_category_id</u>	1
category_template	0
category_layout	0
category_product_layout	0
products_per_row	1
Hits	0
Published	1
created_on	0000-00-00 00:00:00
modified_on	2015-03-29 16:12:37

**9) Table name: categories\_en\_gb**

Attribute name	Data Type	Constraint	Description
<u>virtuemart_category_id</u>	int(4)	FOREIGN KEY	This field is reference to <b>virtuemart_categories</b> 's <b>virtuemart_categories_id</b> field.
category_name	varchar(30)	DEFAULT NULL	It's specifying name of the template which is used for category.
category_description	varchar(64)	DEFAULT NULL	It's specifying name of the template layout which is used for category (UI).
Slug	Char(64)	NOT NULL DEFAULT ''	It's Specify alias name of the category

**Sample Data**

Attribute name	Data
<u>virtuemart_category_id</u>	1
category_name	Western Wear
category_description	western cloth
Slug	western-wear

## 10) Table name: manufacturers

Attribute name	Data Type	Constraint	Description
<u>virtuemart_manufacturer_id</u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	It's specifying manufacturer id.
virtuemart_manufacturercategories_id	int(1)	DEFAULT NULL	It's specify manufacturer categories i.e. Samsung --> TV,Mobile etc.
Hits	int(4)	NOT NULL DEFAULT '0'	Its specifying total hits no of manufacturer.
Published	boolean	NOT NULL DEFAULT '1'	It's specifying that manufacturer is published or not.
created_on	datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	Its specifying date on which manufacturer's information is inserted.
modified_on	datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	Its specifying date on which manufacturer's information is modified.

### Sample Data

Attribute name	Data
<u>virtuemart_manufacturer_id</u>	12
virtuemart_manufacturercategories_id	1
Hits	0
Published	1
created_on	0000-00-00 00:00:00
modified_on	0000-00-00 00:00:00

### 11) Table name: manufacturers\_en\_gb

Attribute name	Data Type	Constraint	Description
virtuemart_manufacturer_id	int(4)	FOREIGN KEY	This field is references to <b>virtuemart_manufacturers's</b> <b>virtuemart_manufacturer_id</b> field.
mf_name	char(20)	NOT NULL DEFAULT ''	It's specifying manufacturer name.
mf_email	varchar(30)	NOT NULL DEFAULT ''	It's specifying manufacturer email.
mf_desc	varchar(50)	NOT NULL DEFAULT ''	It's specifying manufacturer description.
mf_url	char(30)	NOT NULL DEFAULT ''	It's specifying manufacturer URL.

#### Sample Data

Attribute name	Data
virtuemart_manufacturer_id	1
mf_name	caman
mf_email	caman@gmail.com
mf_desc	Desc of caman
mf_url	http://www.caman.org

## 12) Table Name: products

Attribute name	Data Type	Constraint	Description
<u>virtuemart_product_id</u>	int(4)	PRIMARY KEY, AUTO_INCREMENT	It's specifying product id.
product_sku	char(6)	DEFAULT NULL	It's specifying product's code.
product_weight	decimal(3,4)	DEFAULT NULL	It's specifying product's weight.
product_weight_uom	char(7)	DEFAULT NULL	It's specify product's weight unit i.e. grams, KG.
product_length	decimal(3,4)	DEFAULT NULL	It's specifying product's length.
product_width	decimal(3,4)	DEFAULT NULL	It's specifying product's width.
product_height	decimal(3,4)	DEFAULT NULL	It's specifying product's height.
product_lwh_uom	char(7)	DEFAULT NULL	It's specify product's length unit i.e. meter, CM.
product_url	char(255)	DEFAULT NULL	It's specifying product URL.
product_in_stock	int(4)	NOT NULL DEFAULT '0'	It's specifying total no of available products in stock.
product_ordered	int(4)	NOT NULL DEFAULT '0'	Its specifying total no of product ordered or booked.
low_stock_notification	int(4)	NOT NULL DEFAULT '0'	It's specifying low stock no of product which is used for

## Online Shopping Store

			notification on mail to the vendor.
product_available_date	Datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	It's specifying date i.e. On which date product will available for selling.
product_availability	char(20)	DEFAULT NULL	Its specifying text like how much time product will be available for selling. i.e 24h,48 hours,3-5 days etc.
product_special	Boolean	DEFAULT NULL	It's specifying that product is special kind of product or not.
product_sales	int(4)	NOT NULL DEFAULT '0'	It's specifying total no of sell of product.
product_packaging	decimal(3,4)	DEFAULT NULL	It's specifying product weight when packed.
Hits	int(4)	DEFAULT NULL	It's specifying total no of hits (Click) on product page.
Published	boolean	DEFAULT '1'	It's described whether product is published or unpublished.
created_on	datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	It's specify date of product when the product page is created.
modified_on	datetime	NOT NULL DEFAULT '0000-00-00 00:00:00'	It's specify date on which date product information is modified.

# SCREEN LAYOUTS

# Online Shopping Store

## Admin Login

The screenshot shows the Joomla! Administration Login page. At the top, a dark header bar says "Administration". Below it is a light-colored login form titled "Joomla! Administration Login". The form contains fields for "User Name" (set to "admin"), "Password" (set to "\*\*\*\*\*"), and "Language" (set to "Default"). There is also a "Log in" button with a green arrow icon. To the left of the form is a graphic of a padlock. Below the form, a small note says "Use a valid username and password to gain access to the administrator backend." and a link "Go to site home page.". At the bottom of the page, a footer note says "Joomla® is free software released under the GNU General Public License."

☞ This Screenshot shows the administrator login page.

## Admin Home Page

The screenshot shows the Joomla! Administrator Control Panel home page. At the top, a dark header bar says "Administration" and has the "Joomla!" logo. The menu bar below includes links for Site, Users, Menus, Content, Components, Extensions, Help, and VirtueMart. On the right, there are status icons for visitors (0), administrators (1), and a link to "View Site". Below the menu is a grid of 12 icons representing various management modules: Add New Article, Article Manager, Category Manager, Media Manager, Menu Manager, User Manager, Module Manager, Extension Manager, Language Manager, Global Configuration, Template Manager, Edit Profile, and JComments. To the right of the grid is a sidebar with sections for "Last 5 Logged-in Users" (listing Super User as the administrator), "Top 5 Popular Articles", and "Last 5 Added Articles". A red banner at the bottom of the sidebar reads "Administrator Control Panel". At the very bottom, a footer note says "Joomla® is free software released under the GNU General Public License."

☞ This Screenshot shows the administrator home page.

## Admin Shipment Method

The screenshot shows the Joomla! Administration interface for managing Shipment Methods. The left sidebar includes links for VirtueMart, Products, Orders & Shoppers, Manufacturers, Shop (which is selected), Media Files, Shipment Methods, Payment Methods, Configuration, Tools, and VirtueMart 2.6.14. The main content area displays a list of shipment methods. A red box highlights the list table. The table has columns: Shipment Name, Shipment Description, Shopper Group, Shipment Method, List Order, Published, and Id. Two rows are visible, both labeled "Local Courier". The first row has a Shopper Group of "-anonymous-, -default-, Gold Level, Wholesale" and a Shipment Method of "weight\_countries". The second row also has a Shopper Group of "-anonymous-, -default-, Gold Level, Wholesale" and a Shipment Method of "weight\_countries". Both rows have a List Order of 1, are published, and have an Id of 3 and 1 respectively.

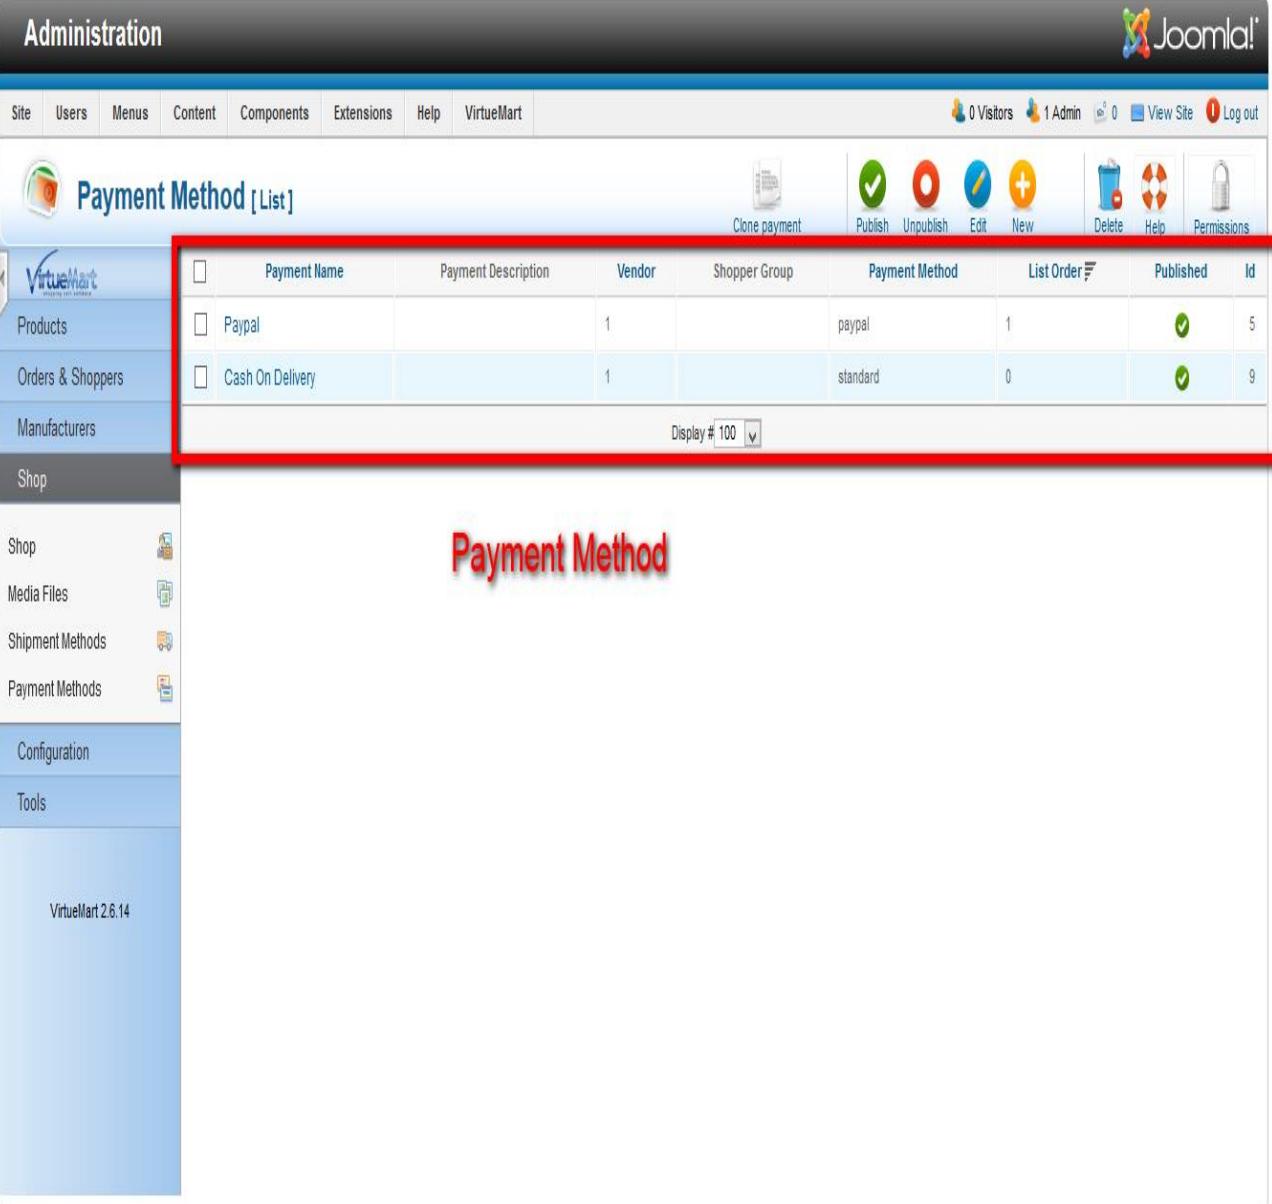

Shipment Name	Shipment Description	Shopper Group	Shipment Method	List Order	Published	Id
Local Courier		-anonymous-, -default-, Gold Level, Wholesale	weight_countries	1	<span style="color: red;">○</span>	3
Local Courier		-anonymous-, -default-, Gold Level, Wholesale	weight_countries	1	<span style="color: green;">✓</span>	1

Joomla! 2.5.27

Joomla!® is free software released under the GNU General Public License.

☞ The screenshot shows the total shipment method available in to the store, Administrator can create new shipment method or manage existing method. All the information about shipment method is stored into shipmentmethods.

## Admin Payment Management

The screenshot shows the Joomla! Administration interface for VirtueMart. The top navigation bar includes Site, Users, Menus, Content, Components, Extensions, Help, VirtueMart, and Joomla! branding. The main menu on the left lists VirtueMart categories: Products, Orders & Shoppers, Manufacturers, Shop, Configuration, Tools, and VirtueMart 2.6.14. The current page is 'Payment Methods' under the Shop category. A red box highlights the table listing payment methods.

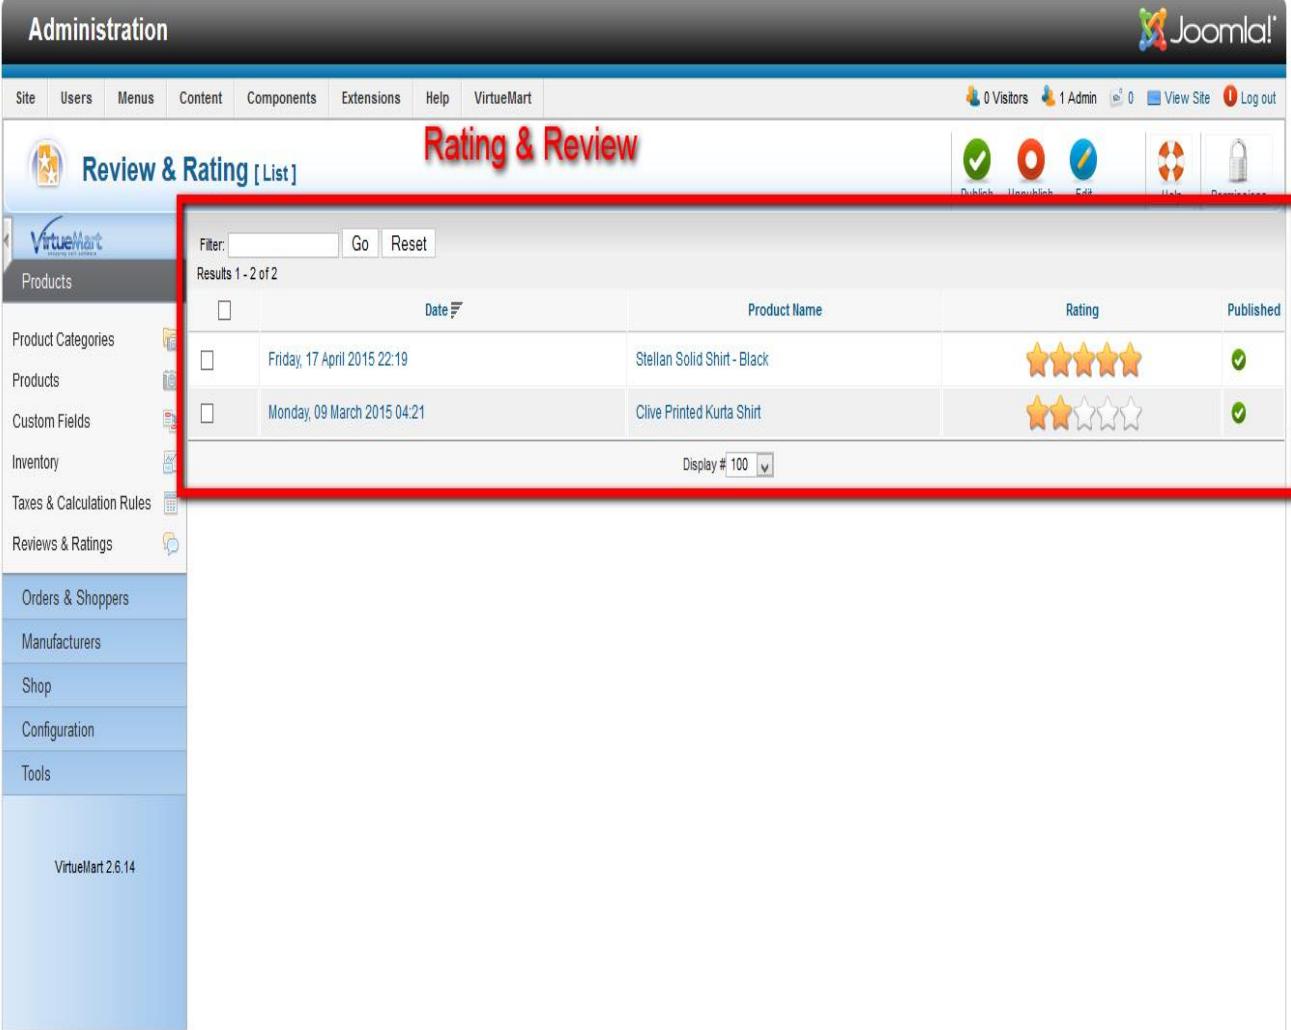

<input type="checkbox"/>	Payment Name	Payment Description	Vendor	Shopper Group	Payment Method	List Order	Published	ID

<input type="checkbox"/>	Cash On Delivery		1		standard	0		9

Display # 100

Payment Method

☞ The screenshot shows the total payment method available in to the store, Administrator can create new payment method or manage existing method. All the information about payment method is stored into paymentmethods.

## Rating & Review

The screenshot shows the Joomla! Administration interface for VirtueMart. The left sidebar has a blue header 'VirtueMart' and lists categories like Products, Product Categories, and Reviews & Ratings. The main content area is titled 'Rating & Review [List]' and shows a table of two reviews. The table columns are Date, Product Name, Rating, and Published. The first review is for 'Stellan Solid Shirt - Black' on Friday, 17 April 2015, rated 5 stars, and published. The second review is for 'Clive Printed Kurta Shirt' on Monday, 09 March 2015, rated 3 stars, and published. A red box highlights the entire table area.

Filter:	<input type="text"/>	<input type="button" value="Go"/>	<input type="button" value="Reset"/>	
Results 1 - 2 of 2				
Date	Product Name	Rating	Published	
<input type="checkbox"/> Friday, 17 April 2015 22:19	Stellan Solid Shirt - Black	★★★★★	✓

→ The screenshot shows all the FAQ created by administrator which is static article and administrator can create new FAQ.

## Home Page

The screenshot displays the homepage of an online shopping store. At the top, there is a navigation bar with links for 'HOME', 'MEN', 'WOMEN', 'OFFER ZONE', 'PREMIUM', 'FAQ'S', and 'CONTACTS'. A search bar is located on the right side of the header. Below the header, there is a large banner featuring a woman in a black t-shirt and a man in a black hoodie. To the left of the banner, there is a menu for 'MEN' with categories like Shirts, T-Shirts, Bottom Wear, Kurta, Winterwear, Footwear, Work Wear, Blazers, Hoodies, and Accessories. Below the banner, there are two promotional banners: 'Online Shopping Made Easy' and 'Shop from Home'. The main content area is divided into several sections: 'FEATURED PRODUCTS' (showing men's shirts), 'NEW COLLECTION' (showing men's shirts), 'RANDOM PRODUCTS' (showing men's shirts), and 'PRODUCT BRANDS' (listing brands like Chanel, Calvin Klein, Prada, Brioni, Sinequanone, and Levi's). At the bottom, there is a footer with links for 'The Service', 'Information', 'Join Us on Facebook', and 'Newsletter'.

➲ This screenshot shows the home page of store.

## Create an Account

The screenshot displays the 'Create User' registration page for the Om Super Market website. The page is titled 'Create User' and is part of the 'YOUR ACCOUNT DETAILS' section. It includes fields for Username, Password, and Confirm Password. Below this, there's a 'REGISTER' section for 'Shopper Information' and 'Personal Details'. The 'Shopper Information' section contains fields for E-Mail, Username, Displayed Name, Password, and Confirm Password. The 'Personal Details' section contains fields for Title, First Name, Middle Name, Last Name, Address 1, Zip / Postal Code, City, Country, State / Province / Region, Phone, and Mobile phone. At the bottom, there's an 'Anti-spam: complete the task' section featuring a CAPTCHA image and two buttons: 'Register' and 'Cancel'.

☞ The screenshot shows the customer registration page of the store. All the entered details will be stored into users, userinfos and vmusers table.

## User Account Activation

The screenshot shows the Om Super Market website's account activation page. At the top, there are links for 'Login or Create an Account' and 'My Account | Wishlist | Checkout'. Below this is the 'Om Super Market' logo with three colored icons (orange, blue, green) representing different clothing items. To the right of the logo are contact details: 'Call Us (+91) 846-074-1352' and a search bar with placeholder text 'Type text and press enter' and a magnifying glass icon. A red 'Cart (0)' button is also present. The main navigation menu includes 'HOME', 'MEN ▾', 'WOMEN ▾', 'OFFER ZONE', 'PREMIUM ▾', 'FAQ'S', and 'CONTACTS ▾'. The breadcrumb navigation shows 'Home > My Account > Your account details'. The central content area has a red border and displays a message: 'Activation link sent to the user's Email address' in large red text, followed by a smaller note: 'Registration Completed! Your account has been created and an activation link has been sent to the e-mail address you entered. Note that you must activate the account by clicking on the activation link when you get the e-mail before you can login.' To the left of this message is a light blue 'YOUR ACCOUNT DETAILS' section containing a login form with fields for 'Username' and 'Password', and links for 'Forgot your username?' and 'Forgot your password?'. It also includes a 'Remember me' checkbox and a red 'Log in' button. To the right of the main content are three sidebar sections: 'COMPARE PRODUCTS' (empty), 'WISHLIST PRODUCTS' (empty), and 'CATEGORIES' with dropdown menus for 'Men' and 'Women'.

The screenshot shows that activation link is sent to the user's entered email address.

A message from **Om Super Market via eigobox.net** is selected, showing the following content:

**Your Om Super Market password reset request**

**Forgot Password Link and code**

Hello,

A request has been made to reset your Om Super Market account password. To reset your password, you will need to submit this verification code in order to verify that the request was legitimate.

The verification code is e8ecc921463884ca8bf938ede05dee1c

Click on the URL below to enter the verification code and proceed with resetting your password.

<http://localhost/Shyamal/OmSuperMarket/index.php/en/user-profile?view=reset&layout=confirm>

Thank you.

A red box highlights the verification code and the URL. A red arrow points from the text "The verification code is" to the code itself. Another red arrow points from the text "Click on the URL below" to the URL link.

→ The screenshot shows that new password link and code is received to the email address.

## Site Map

The screenshot shows the homepage of the "Omn Super Market" website. At the top, there is a navigation bar with links for "Login or Create an Account", "My Account", "Wishlist", "Checkout", "Call Us (+91) 846-074-1352", a search bar, and a "Cart (0)" button. Below the navigation bar, there are main menu categories: HOME, MEN, WOMEN, OFFER ZONE, PREMIUM, FAQ'S, and CONTACTS. The "MEN" category is expanded, showing sub-categories like ACCESSORIES, BRAZERS, FOOTWEAR, HOODIES, KURTAS, and SHIRTS, each with a list of product names. The "WOMEN" category is also expanded, showing sub-categories like ACCESSORIES, BRAZERS, FOOTWEAR, HOODIES, KURTAS, and SHIRTS, with similar product lists. The central content area is titled "Site Map" in red.

# SYSTEM TESTING

**❖ Test Cases:**

Sr.No	Scenario	Purpose	Input	Expected Output	Status
1	Cross Browser Compatibility	User interface of the website will remain same	-	Website runs perfectly	Pass
2	Registration	This test will perform for registration for new user	Fill up all the required details	User registration successfully	Pass
3	Login	This test will perform authentication of the user	Right username and password	Website allow log in successfully	Pass
4	Login	This test will perform authentication of the user	Wrong username and password	Website don't allow user to log in	Pass
6	Forgot Username	Perform reminding of username	Registered email address and capchar	Username send to mail successfully	Pass
7	Forgot Password	User can change the password if they forgot	Registered email address and capchar	New Password change link and code is sent to email	Pass
8	Add New Product	This test will perform when try to insert new product in system	Provide all necessary product information	Product add successfully	Pass

➤ **Future Enhancement:-**

- Integrate the web service of various shipment partners so user can track their package.
- Integrating all the payment method like Credit Card, Debit Card, Online banking.
- Creating a service which shows the price of that product in other website.
- Delivering order status through SMS.
